

Samuel Fetene

Software Engineer | AI Developer | Full-Stack Developer
Addis Ababa, Ethiopia | samuelfetene26@email.com | +25195599386

Professional Summary

Detail-oriented Computer Science graduate with strong foundations in software engineering, AI systems, machine learning, and full-stack web development. Experienced in designing and building scalable technical solutions using Python, PHP, JavaScript, SQL, and modern web technologies. Demonstrated ability to engineer responsive applications, develop machine learning models, implement search algorithms, and optimize software systems for usability and performance. Strong analytical problem-solving skills with a focus on clean architecture, system efficiency, and user-centered engineering.

Technical Skills

Programming Languages	Python, JavaScript (ES6+), PHP, C++, SQL
AI & Machine Learning	TensorFlow, Keras, Scikit-learn, LSTM Models, Search Algorithms
Web Development	HTML5, CSS3, Responsive Design, Bootstrap, Streamlit, WordPress
Database & Backend	MySQL, Database Design, Backend Development
Tools & Engineering	Git, Linux, Software Testing, System Design

Professional Experience

Software Tester — 2F Digital Marketing | Addis Ababa

Jan 2026 – Feb 2026

- Executed comprehensive manual software testing cycles across multiple application workflows.
- Identified, documented, and reported functional bugs and UI inconsistencies.
- Verified alignment between implemented software behavior and functional specifications.
- Contributed to software quality assurance and usability improvements.

Freelance Web Developer — Remote

2021 – Present

- Designed and developed responsive business websites using modern frontend technologies.
- Implemented mobile-first layouts and cross-browser compatibility optimizations.
- Collaborated with clients to deliver scalable and user-focused digital solutions.
- Improved UI/UX structure and performance for small business web platforms.

Selected Projects

Forex & Stock Prediction System

Developed an AI-powered forecasting dashboard using LSTM neural networks and technical indicators for financial market prediction using Python, TensorFlow, and Keras.

AI Search & Planning Algorithms

Implemented DFS, BFS, and A* algorithms for solving state-space search problems including maze traversal and 8-puzzle optimization scenarios.

Certificate Authentication Platform

Built a secure PHP and MySQL-based credential verification platform with administrative workflows, authentication logic, and logging mechanisms.

YBS Business Solution Platform

Designed and developed a professional business-oriented web platform with modern UI/UX principles, interactive components, and responsive architecture.

Education

Bachelor of Science (B.Sc.) in Computer Science

Unity University

2022 – 2026

Specialization areas included:

- Software Engineering
- Artificial Intelligence & Machine Learning
- Database Systems
- Algorithm Design & Analysis

Achieved an A Grade in final-year capstone project work.

Core Strengths

- Analytical problem-solving and algorithmic thinking
- Clean code architecture and maintainable software design
- Full-stack development fundamentals
- Responsive UI/UX implementation
- AI/ML system development
- Software testing and debugging
- Strong adaptability and continuous learning mindset
